

## LESSONS POSTPONED

The farm is taking an extended operational pause on lessons to work through an equine herpes-virus (EHV) case that has quarantined the west aisle of the barn.

It is important to note that EHV is NOT zoonotic, meaning that it can not be transmitted from horses to humans.

For more information, please see the email that was sent to all students and parents and the current press release online at [www.chagrinvalleyfarms.com](http://www.chagrinvalleyfarms.com).
